Before Socrates, philosophy was primarily concerned with cosmology, metaphysics, and the natural world. This era, often called the Pre-Socratic period, featured thinkers who sought to explain the fundamental nature of reality through reason and observation rather than mythology. Pre-Socratic philosophers laid the groundwork for critical thinking and inquiry, which Socrates would later challenge and expand upon.

Key Pre-Socratic Philosophers

The Pre-Socratic era included several influential philosophers whose ideas shaped early Western thought. They examined the origins and principles of the cosmos, paving the way for philosophical inquiry.

- **Anaximander:** Developed the concept of the "apeiron" or the infinite as the origin of all things.
- **Heraclitus:** Known for his doctrine of change, stating that everything is in flux.
- **Parmenides:** Argued for the permanence of being, challenging the notion of change.
- **Democritus:** Formulated an early atomic theory of the universe.
