The Concept of Rising Sign in Astrology

The rising sign, or Ascendant, is the zodiac sign that was ascending on the eastern horizon at the exact time of a person's birth. It is a critical component of an individual's natal chart and influences their outward personality, appearance, and initial reactions to the environment. Unlike the Sun sign, which represents the core self, the rising sign governs how others perceive a person and how they project themselves in the world.

How the Rising Sign Differs from the Sun Sign

While the Sun sign illustrates the essence and fundamental identity of a person, the rising sign acts as a mask or persona that one wears in public. It colors the way Aquarian traits are expressed for someone born on February 3, potentially softening or intensifying certain characteristics.
