## Harvesting Process

After harvesting, the pods are dried carefully to preserve their essential oils and flavor.

## Global Production

India and Guatemala are the largest producers of cardamom worldwide. Indian cardamom is primarily green cardamom, known for its superior flavor, while Guatemala focuses on commercial-scale production that serves global markets.

Cardamom pods should be stored in airtight containers in a cool, dark place to retain their essential oils. Whole pods preserve flavor longer than ground cardamom, which tends to lose potency quickly. For extended shelf life, refrigeration or freezing is an option but should be done with airtight

packaging.

## Purchasing Tips

When buying kardemomme engelsk, it is advisable to select whole pods over pre-ground powder for maximum flavor and freshness. Look for vibrant green pods without signs of mold or damage. Organic and sustainably sourced cardamom may offer higher quality and environmental benefits.
