Program Overview

The Mt Sinai Queens internal medicine residency is designed to deliver a well-rounded education that prepares residents for independent practice or subspecialty training. The program is accredited by the Accreditation Council for Graduate Medical Education (ACGME), ensuring adherence to rigorous educational standards. It offers a three-year categorical track that balances inpatient and outpatient experiences. Located within the Mount Sinai Health System, residents have access to a broad network of resources and interdisciplinary collaboration opportunities. The patient population served is ethnically and socioeconomically diverse, providing residents with extensive experience in managing a wide range of medical conditions.

Mission and Vision

The program's mission focuses on developing physicians who are clinically competent,

compassionate, and culturally sensitive. It aims to foster lifelong learning and professional development through a curriculum that emphasizes evidence-based medicine, patient-centered care, and health equity. The vision includes training leaders in internal medicine who contribute meaningfully to their communities and the medical field.

Program Structure

The residency is structured to progressively build clinical autonomy and decision-making skills. Residents rotate through various specialties including general medicine, cardiology, endocrinology, infectious diseases, and critical care. The program also incorporates longitudinal outpatient clinics, allowing residents to follow patients over time and develop strong continuity of care skills.

Curriculum and Clinical Training

The curriculum is comprehensive and designed to cover the core competencies required in internal medicine practice. It integrates didactic sessions, hands-on clinical work, simulation exercises, and interdisciplinary conferences. Training occurs in both inpatient wards and outpatient clinics, ensuring exposure to acute and chronic disease management.

Inpatient Experience

Inpatient rotations provide residents with the opportunity to manage complex cases under the supervision of experienced hospitalists and specialists. Residents participate in daily rounds, diagnostic workups, treatment planning, and patient communication. The high-volume clinical setting at Mt Sinai Queens exposes residents to diverse pathologies, enhancing their diagnostic acumen and procedural skills.

Outpatient Clinics

Outpatient training is an essential component of the program, where residents manage chronic illnesses, preventive care, and health maintenance. The continuity clinics emphasize patient relationships and long-term management strategies. Residents receive feedback on clinical decision-making and patient communication during these sessions.

Didactic Education

The educational curriculum includes regular lectures, case conferences, journal clubs, and morbidity and mortality meetings. Topics cover a wide spectrum, from foundational medical knowledge to recent advances in internal medicine. The program encourages active participation and critical

thinking during academic sessions.

Faculty and Mentorship
