Background and Purpose of the Stanford Elimination of Harmful Language Full List

The Stanford elimination of harmful language full list was developed as part of a broader institutional commitment to diversity, equity, and inclusion (DEI). The initiative recognizes that language plays a crucial role in shaping perceptions and experiences, particularly in educational environments. Language that marginalizes or dehumanizes individuals based on race, gender, ethnicity, disability, or other identities can perpetuate systemic inequalities. Consequently, Stanford University embarked on compiling a thorough list of terms and expressions deemed harmful or outdated, aiming to guide faculty, staff, and students in adopting more inclusive language practices. This effort aligns with similar movements across academic institutions and organizations striving to cultivate respectful communication that reflects evolving societal values.

Categories of Harmful Language Identified

The Stanford elimination of harmful language full list organizes problematic language into distinct categories to facilitate understanding and application. These categories highlight the diverse dimensions of harm that language can inflict, including explicit slurs, implicit biases, and outdated terminology. Categorization also aids in creating targeted educational resources and policies for language use.

Racial and Ethnic Slurs

Terms that demean or stereotype individuals based on race or ethnicity are a primary focus. The list includes historically offensive words and phrases that have been used to oppress or marginalize racial and ethnic groups.

Gender-Inclusive Language

This category addresses language that reinforces gender binaries or excludes non-binary and transgender individuals. It encourages the use of gender-neutral pronouns and terms that respect diverse gender identities.

Disability and Mental Health Terminology

Language that stigmatizes disabilities or mental health conditions is identified to promote respectful and person-first communication. The list discourages terms that perpetuate stereotypes or trivialize experiences related to disabilities.

Ageism and Generational Bias

Words and phrases that convey negative assumptions about age or generational groups are included to combat ageist attitudes and foster intergenerational respect.

Other Forms of Harmful Language

This encompasses language related to religion, sexual orientation, socioeconomic status, and other identity markers that may cause exclusion or offense.

Examples Included in the Stanford Elimination of Harmful Language Full List

The Stanford elimination of harmful language full list provides concrete examples of terms and phrases to avoid, accompanied by suggested alternatives that promote inclusivity and respect. Below are some illustrative examples from the list:

- **“Guys”** – Recommended replacement: “Everyone,” “Folks,” or “Team” to avoid gendered language.
- **“Illegal immigrant”** – Recommended replacement: “Undocumented immigrant” or “Undocumented person” to reduce criminalizing language.
- **“Crazy” or “Insane”** – Suggested alternatives: “Unusual,” “Unexpected,” or specific descriptive terms that avoid mental health stigma.
- **“Master” and “Slave” (in technical contexts)** – Encouraged replacement: “Primary” and “Secondary” or other neutral terms to eliminate associations with slavery.
- **“Manpower”** – Recommended replacement: “Workforce” or “Staff” to use gender-neutral terminology.
- **“Handicapped”** – Suggested alternatives: “Person with a disability” or “Accessible” to emphasize person-first language.

These examples demonstrate the list’s practical guidance for revising common language use that may inadvertently perpetuate harm or bias.

Implementation and Impact in Academic Settings

Stanford University has incorporated the elimination of harmful language full list into various institutional policies and educational programs. The list serves as a foundational tool for faculty training, curriculum development, and campus communications. By encouraging the adoption of inclusive language, Stanford aims to create environments where all community members feel valued and respected.

Faculty and Staff Training

Workshops and seminars educate faculty and staff about the importance of language sensitivity and provide strategies for integrating inclusive terminology in teaching and administrative duties.

Curriculum and Academic Materials

Course syllabi, reading materials, and assessment criteria are reviewed to identify and replace harmful language. This ongoing process ensures academic content reflects the university’s commitment to equity.

Student Engagement and Awareness

Students are encouraged to participate in dialogues and initiatives that promote inclusive language, fostering a campus culture that challenges harmful norms and embraces diversity.

Ongoing Updates and Community Involvement

The Stanford elimination of harmful language full list is a dynamic document that evolves in response to cultural shifts, community feedback, and emerging research on language and bias. Stanford actively involves stakeholders from diverse backgrounds to review and update the list regularly.

Feedback Mechanisms

Channels for students, faculty, and staff to propose additions or revisions ensure the list remains relevant and comprehensive.

Collaborations with External Experts

Partnerships with linguists, sociologists, and diversity experts inform the list's development and help incorporate best practices from across disciplines.

Transparency and Accessibility

The list and accompanying resources are made publicly available within the Stanford community to encourage widespread adoption and understanding.

Through these continuous efforts, the Stanford elimination of harmful language full list reinforces the institution's dedication to fostering an inclusive academic environment free from linguistic harm and bias.
