Program Overview

The suny downstate family medicine residency is a three-year graduate medical education program located in Brooklyn, New York. It is affiliated with the State University of New York Downstate Health Sciences University, providing residents access to a well-established academic medical center. The program is committed to training culturally competent, patient-centered family physicians equipped to serve diverse communities. Residents receive exposure to a wide range of medical conditions across all age groups, emphasizing preventative care, chronic disease management, and acute care in both hospital and outpatient settings. The program's mission is to foster excellence in clinical practice, education, and research within family medicine.

Program Mission and Goals

The mission of the SUNY Downstate Family Medicine Residency is to train physicians who provide compassionate, comprehensive, and evidence-based care. Goals include developing residents' clinical skills, promoting lifelong learning, enhancing community health, and encouraging leadership

roles within the healthcare system. The program strives to prepare graduates for board certification and successful careers in various practice settings.

Accreditation and Recognition

The residency program is fully accredited by the Accreditation Council for Graduate Medical Education (ACGME), ensuring adherence to rigorous educational standards. It has a strong track record of board pass rates, resident satisfaction, and successful placement of graduates into competitive fellowships and primary care positions.

Curriculum and Clinical Training

The curriculum of the suny downstate family medicine residency is designed to balance inpatient and outpatient experiences, emphasizing comprehensive care across all ages and conditions. It incorporates rotations in core specialties such as pediatrics, obstetrics and gynecology, internal medicine, psychiatry, and emergency medicine. The program also provides training in procedural skills and team-based care models.

Core Rotations

Residents complete a variety of core rotations to gain a broad clinical foundation, including:

- Family Medicine Outpatient Clinic
- Inpatient Family Medicine Service
- Pediatrics
- Obstetrics and Gynecology
- Internal Medicine
- Psychiatry and Behavioral Health
- Emergency Medicine

Continuity Clinic Experience

Continuity clinic is a central component of the residency, allowing residents to manage their own panel of patients over the three years. This longitudinal experience fosters long-term doctor-patient relationships and enhances skills in preventive care, chronic disease management, and patient education.

Procedural Training

Residents receive hands-on training in common family medicine procedures such as skin biopsies, joint injections, wound care, and basic obstetric procedures. The program encourages proficiency in these skills to prepare residents for comprehensive outpatient practice.

Faculty and Mentorship

The suny downstate family medicine residency boasts a diverse and experienced faculty committed to resident education and professional development. Faculty members include board-certified family physicians, subspecialists, and academic leaders who provide clinical supervision, didactic teaching, and career mentoring.

Faculty Expertise

Faculty bring expertise in various areas including adolescent medicine, geriatrics, women's health, sports medicine, and community health. This diversity enriches the educational environment and allows residents to explore subspecialty interests.

Mentorship Programs

Each resident is paired with faculty mentors who guide them through clinical challenges, research projects, and career planning. Regular feedback and individualized support help residents achieve their educational and professional goals.
